

Sprint 3 Requirements/Planning

ID 5: "What If" Calculation

- Description: User can input a hypothetical score for an ungraded assignment to predict its impact on the final grade.
- Type: Feature
- Priority: 7
- Story Points: 13

ID 7: Security: Data Transmission Encryption

- Description: Ensure all data transmission (if cloud used) is encrypted (HTTPS/SSL).
- Type: Security/Non-Functional
- Priority: 20
- Story Points: 2

ID 8: Summary Report

- Description: Provide a summary report showing total points earned vs. total points possible across all assignments.
- Type: Feature
- Priority: 21
- Story Points: 2

ID 9: Refinement: Optimization

- Description: Optimize grade calculation algorithms for handling a large number of assignments (\$>100\$).
- Type: Refinement/Technical
- Priority: 22
- Story Points: 3

ID 10: Accessibility: WCAG Standards

- Description: Ensure the final GUI design meets WCAG minimum accessibility standards (e.g., keyboard navigation).
- Type: Non-Functional
- Priority: 23
- Story Points: 5
